CONTENTS OF VOLUME VII.

NUMBER XIX.

Page.

Art. I. Review of Chambers's Ancient Sea Margins, with Observations on the study of Terraces; by James D. Dana, - 1

II. On a New Formula for Interpolations; by J. H. Alexander, Esq., - - - - - - - - - - 14

III. On the Fossil Remains of Birds collected in various parts of New Zealand by Mr. Walter Mantell, of Wellington; by Gideon Algernon Mantell, Esq., LL.D., F.R.S., - - 28

IV. Parallelism of the Palæozoic Formations of North America, with those of Europe; by Ed. de Verneuil, - - - 45

V. The Dodo and its Kindred, or the History, Affinities and Osteology of the Dodo, Solitaire and other extinct Birds of the Islands Mauritius, Rodriguez, and Bourbon; by H. E. Strickland, and A. G. Melville, - - - - - - 52

VI. On Single and Double Vision produced by viewing objects with both eyes: and on an Optical Illusion with regard to the distance of objects; by John Locke, - - - 68

VII. Analysis of the Bittern of a Saline on the Kiskiminetas River, near Freeport, Armstrong County, Pennsylvania; by M. H. Boyé, M.D., A.M., - - - - - - - 74

VIII. On the Comparative Value of different Kinds of Coal for the purpose of Illumination; and on Methods not hitherto practised for ascertaining the Value of the Gases they afford; by Andrew Fyfe, M.D., F.R.S.E., F.R.S.S.A., - 77

IX. Mineralogical Description of the Island of Bánká; by Thomas Horsfield, Esq., M.D., - - - - - - 86

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—An Inquiry into the Amount of Inorganic Constituents contained in Ale and Porter, by Thomas Dickson, 102.—On a New Method for the Detection of Bromine and Iodine, by Dr. G. L. Cantu: Researches on the Compounds of Titanium, by G. M. Ebelman, 106.—On some Volatile Products resulting from the decomposition of Albumen, Fibrine, Caseine and Gelatine, by oxydizing agents, by Dr. G. Guckelberger, 107.—Phosphorus, 111.—Observations on Manna, by J. Stettner, 112.

Mineralogy and Geology.—Analysis of Ehlite, by R. Rhodius: Analysis of Brandisite, by von Kobell: On Völknerite, a new Mineral, by M. Hermann: Ce-

ramohalite, by J. Jurasky: Feldspar in the "Orbicular Diorite" of Corsica, by M. Delesse, 113.—On the Products of Eruption at Hecla, by Dr. F. A. Genth: On the Nummulite Limestone of Alabama, by C. Lyell, 114.

Zoology.—Some Notes on Mexican Birds, heretofore not fully described, by Geo. A. McCall, U.S.A., 114.—Description of new species of Birds, by John Cassin, 115.—Otters in Hadley, Mass., 117.

Astronomy.—Le Verrier's Remarks on the Planet Neptune, 118.—Eighth Satellite of Saturn: Elements of Petersen's Comet of August, 1848, 122.—New Comet: Comet Medal: Some Remarks upon an American Nautical Almanac, 123.

Miscellaneous Intelligence.—Gold in California, 125.—Auroral Bow of April 7, 1847, 126.—Aurora Borealis, Nov. 17, 1848, 127.—Relation between the Coefficient of Elasticity of Metals, and their latent heat of fusion, by C. C. Person, 128.—On the Existence of the Color Brown, by Ernest Brucke: Inundation of the Indus, 129.—Flood in the Macquarie, in Australia, 130.—On the Apparent Motion of the Figures in certain Patterns of Blue and Red Worsted, by Henry Taylor, 132.—The Tea Plantations in the N.W. Provinces of India, and the Culture of American Cotton in India, 135.—Expedition into Australia: Platinum, 137.—Mines in Australia: The Nile: A Cabinet of Minerals for sale, collected by the late Dr. Crawe, 138.—*Obituary.*—William Oakes, A.M., 138.—Death of Robert Gilmor, Esq., 142.—Dr. Samuel Guthrie: Dr. A. Goldfuss, 143.

Bibliography.—The Sailor's Horn-Book for the Law of Storms, by Henry Piddington, 144.—Memoir, Geographical, Political and Commercial, on the Present State, Productive Resources and Capabilities of Siberia, Manchuria, and the Asiatic Islands of the Northern Pacific Ocean, &c., by Aaron H. Palmer, 148.—Memoirs of the American Academy of Arts and Sciences, 149.—An Elementary Treatise of Spherical Geometry and Trigonometry, by Anthony D. Stanley, A.M.: The Philosophy of Geology, by A. C. G. Jobert;—also, Ideas or Outlines of a new System of Philosophy, by A. C. G. Jobert, &c.: Observations on Belemnites and other Fossil Remains of Cephalopoda, discovered by Mr. Reginald Neville Mantell, C.E., in the Oxford clay near Trowbridge, in Wiltshire, by Gideon Algernon Mantell, Esq., LL.D., F.R.S., F.L.S., &c.: A Memoir on the Structure of the Maxillary and Dental organs of the Iguanodon, by G. A. Mantell, &c., 150.—A Memoir on the Dinornis, by Professor Owen, F.R.S., F.Z.S., &c. &c.: Collections of the Georgia Historical Society: Memoirs read before the American Association for the Promotion of Science, 151.

List of Works, 151.

NUMBER XX.

Page.

Art. X. Some New Discoveries respecting the Dates on the great Calendar Stone of the Ancient Mexicans, with Observations on the Mexican Cycle of Fifty-two Years; by E. G. Squier, 153

XI. On the Comparative Value of different Kinds of Coal for the purpose of Illumination; and on Methods not hitherto practised for ascertaining the Value of the Gases they afford; by Andrew Fyfe, M.D., F.R.S.E., F.R.S.S.A., - - 157

Page.

XII. Notes on some Chenopodiaceæ, growing spontaneously, about the City of New York; by JOHN CAREY, - - 167

XIII. Analysis of the Braunau Meteoric Iron; by Dr. N. W. FISCHER, - - - - - - - - - - - 171

XIV. On the Acid Springs and Gypsum Deposits of the Onondaga Salt Group; by T. S. HUNT, - - - - - - 175

XV. On the Fundamental Principles of Mathematics; by Professor STEPHEN ALEXANDER, - - - - - - - - 178

XVI. Notes on the Geology of Charleston, S. C.; by F. S. HOLMES, - - - - - - - - - - - 187

XVII. Description of two Reptiles from Oregon; by Mr. AVERY J. SKILTON, (With a plate.) - - - - - - - - 202

XVIII. Range of the Gutta Taban Collectors, and present amount of Imports into Singapore, - - - - - - - - 203

XIX. Application of the Galvanic Circuit to an Astronomical Clock and Telegraph Register in determining local differences of longitude, and in astronomical observations generally, in a communication by SEARS C. WALKER, Assistant U. S. C. S., addressed to Prof. A. D. BACHE, LL.D., Supt. U. S. Coast Survey, - - - - - - - - - 206

XX. Parallelism of the Palæozoic Formations of North America, with those of Europe; by ED. DE VERNEUIL, translated, with annotations, by JAMES HALL, - - - - - - 218

XXI. General Rule for Involution and Evolution by Logarithms; by Prof. J. L. RIDDELL, M.D., - - - - - - 232

XXII. Abstract of a Series of Experiments on Diamagnetism; by H. C. ŒRSTED, - - - - - - - - - - 233

XXIII. Abstract of a Meteorological Journal, kept at Marietta, Ohio, by S. P. HILDRETH, M.D., - - - - - - - 240

XXIV. On a new Protractor for Trisecting Angles; by J. H. ALEXANDER, Esq., - - - - - - - - - 243

XXV. Notes on Upper California; by JAMES D. DANA, - - 247

XXVI. Some remarks on the Navicula Spencerii, and on a still more difficult test object; by J. W. BAILEY, - - - - 265

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On some New Relations of the Diamagnetic Force, by Prof. PLÜCKER, 270.—On the Action of the Red, Orange and Yellow Rays upon Iodized and Bromo-iodized Silver Plates, after they have been affected by daylight, and other Phenomena of Photography, by M. CLAUDET: On the Influence of Light in preventing Chemical Action, by Mr. R. HUNT, 272.—An Examination of Berkeley's Theory of Vision, by Sir D. BREWSTER, 273.—On the Peculiar Cooling Effects of Hydrogen and its Compounds in Cases of Voltaic Ignition, by W. R. GROVE, Esq., 274.—Report on Coloring Matters, by Dr. E.

Schunck, 275.—On the Alloys of Tungsten with Copper and other Metals, by Dr. Percy: Analysis of Wrought Iron produced by Cementation from Cast Iron, by Prof. Miller: Gutta Percha, 276.—Report on the Air and Water of Towns, by Dr. Smith, 279.—On the Manufacture of Ice, 280.—Composition of the Tungstates, by A. Laurent, 281.—On the Crystallization of Sulphur, by M. S. Pasteur and M. Ch. Deville, 282.

Mineralogy and Geology.—Examination of the Telluret of Bismuth, from Virginia, by Coleman Fisher, Jr., 282.—Emery Formation of Asia Minor, by J. Lawrence Smith, 283.—Chrome and Meerschaum of Asia Minor, by J. Lawrence Smith, 285.—Axinite in Maine: Copper of the Lake Superior Region, 286.—Observations on the "Old Crater" adjoining Kilauea, (Hawaii,) on the east, by Rev. C. S. Lyman, 287.

Zoology.—On the Boring of Mollusca into Rocks and on the removal of Portions of their Shells, by Mr. A. Hancock, 288.

Astronomy.—Denial of the Discovery of the tenth asteroid, Diana: Ecliptic Star Charts, 290.

Miscellaneous Intelligence.—Observations on California, by Rev. C. S. Lyman, 290.—Analysis of Ashes, from a letter from Mr. Fleitmann to Prof. Horsford, 292.—Aurora Borealis of Nov. 17, 1848, 293.—Gold Mining in Virginia, 295.—On Common Salt as a Poison to Plants, by W. B. Randall, 299.—On the Influence of Temperature upon the Distribution of Fauna in the Ægean Sea, by Lieut. Spratt, 300.—On the Advantageous Use made of the Gaseous Escape from the Blast Furnaces of Ystalyfera, by Mr. J. Palmer Budd: Lawrence Scientific School at Cambridge: Daguerrotypes of a Chimpanzee, a species of Orang Otang, 303.—Climate of Italy: Goitre due to Magnesian Salts in water: Motive power: Coal in the Straits of Magellan: Gun Cotton for tooth ache, 304· Native Silver in Norway: Naphtha Spring near Alfreton, England: Prizes: Chloroform, as a solvent, 305.—*Appendix.*—Observations on California, from the correspondence of the Rev. C. S. Lyman, 305.

Bibliography.—Alph. De Candolle, Prodromus Reg. Veg.: pars. XII, Sistens Labiatas et quinque minores Corolliflorarum ordines, 309.—Annals of the Lyceum of Natural History of New York, 311.

List of Works, 311.

NUMBER XXI.

Page.

Art. XXVII. Notice of, and citations from a Voyage of Discovery and Research in the Southern and Antarctic Regions, during the years 1839–43, by Captain Sir James Clark Ross, R. N., Knt., D.C.L. Oxon., F.R.S, etc., - - - 313

XXVIII. On the Fundamental Principles of Mathematics; by Prof. Stephen Alexander, - - - - - - - 329

XXIX. Results additional to those offered by Dr. Locke from his Three Experiments, "On Single and Double Vision, produced by viewing objects with both eyes;" by S. Pearl Lathrop, M.D., - - - - - - - - - 343

Page.

XXX. Observations on American Species of the Genus Potamogeton, L.; by EDWARD TUCKERMAN, A.M., - - - 347

XXXI. On a New Table of the Pressure of Steam at various Temperatures; by J. H. ALEXANDER, Esq., - - - 361

XXXII. On the Dispersion of Light; by Lieut. E. B. HUNT, 364

XXXIII. Polarization of Galvanic Light; by Professor CHAS. G. PAGE, M.D., - - - - - - - - - - 375

XXXIV. Observations on some points in the Physical Geography of Oregon and Upper California; by JAMES D. DANA, - 376

XXXV. On Biogen, or the so-called Albumen in the Ovarian Egg, (from a letter of E. DESOR to Prof. C. VOGT,) - - 395

XXXVI. On some principles to be considered in Chemical Classifications; by T. S. HUNT, - - - - - - - 399

XXXVII. New and Rare Plants, chiefly of the Carolinas; by M. A. CURTIS, - - - - - - - - - 406

XXXVIII. On Gibbsite and Allophane, from Richmond, Mass.; by Prof. B. SILLIMAN, Jr., - - - - - - - 411

XXXIX. Notice of a Novel Mode of Discharging a Leyden Battery, with an explanation of its theory; by J. H. LANE, 418

XL. On the Action of Nitric Acid on Sebacic Acid; by ADOLPH SCHLIEPER, - - - - - - - - - - 420

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the Crystalline Polarity of Bismuth and other bodies, and on its relation to the Magnetic Form of Force, by Dr. FARADAY, 425.—Method of obtaining crystalline combinations by Heat, and of reproducing thereby various mineral species, by M. EBELMAN: Researches upon Wax, by BENJAMIN COLLINS BRODIE, 427.—On Chloropicrine, by Dr. JOHN STENHOUSE, PH.D., 429.—On Turpentine Camphor, by Dr. C. LIST, 430.—Improved Method of preserving Milk, patented by F. H. F. LOUIS: On a New Method for Amalgamating Zinc, by Prof. O. N. STODDARD, 431.—A Magneto-Tangential Machine, by Prof. O. N. STODDARD, 432.

Mineralogy and Geology.—Compact Diamond from Brazil, by M. DUFRENOY: Phosphorescence of the Diamond, by M. REISS: Examination of three new mineralogical Species, proposed by Prof. C. U. SHEPARD, by J. D. WHITNEY, 433.—Chemical examination of some Minerals, by J. D. WHITNEY, 434.—On the Constitution of some Silicates containing Carbonic Acid, Chlorine and Sulphuric Acid, by J. D. WHITNEY, 435.—Mineral Coal on the Nile: Mineral Coal of Vancouver's Island, North West America: Gold of Africa, 436.—Vesuvius, 437.

Zoology.—New localities of Infusoria in the Tertiary of Maryland, by Prof. J. W. BAILEY: The Oyster, 437.—New Discoveries of Bones of the Iguanodon, by GIDEON ALGERNON MANTELL, 438.—Additional Observations on the Osteology of the Iguanodon and Hylæosaurus, by GIDEON ALGERNON MANTELL, Esq., LL.D., F.R.S., &c., 439.—Fossil Squalidæ of the United States, by R. W. GIBBES, M.D., 441.

Astronomy.—Le Verrier's Further Vindication of his predicted theory of Neptune, 442.—Indication of a Method of testing Olbers's Theory respecting the common origin of the small Planets, by S. Alexander, 447.—New Comet, 449.

Miscellaneous Intelligence.—On Meteoric Iron in South Carolina, by Charles Upham Shepard, 449.—Staite's Electric Light, 450.—Anniversary of the Geological Society for 1849, held in London, 451.—*Obituary.*—Edward Forster, Esq.: M. Hommaire de Hell, 451.—Dr. George Fownes: Dr. Prichard, 452.

Bibliography.—Botanical Collections in New Mexico, and in the Rocky Mountains: Hooker's London Journal of Botany and Kew Garden Miscellany, 452.—Posthumous Papers, bequeathed to the Hon. East India Company by the late Wm. Griffith, F.L.S., &c.: Bibliographia Zoologiæ et Geologiæ, &c., by Prof. L. Agassiz, 454.—Observations at the Magnetic and Meteorological Observatory, at the Girard College, Philadelphia, made under the direction of A. D. Bache, LL.D.: An Introduction to Practical Chemistry and Analysis, by John E. Bowman, 455.—Gmelin's Chemistry: Transactions of the American Ethnological Society, 456.—Verhandlungen der Russisch-Kaiserlichen Mineralogischen Gesellschaft zu St. Petersburg, 457.

List of Works, 457.

Index, 459.

ERRATA.

Page 114, line 2 from top, for *Marbury*, read *Marburg*.

P. 126, line 29, &c., *Southern edge of bow is*, should connect directly with *at Regulus* and *at pi Leonis*.

P. 153, line 20 from bottom, for *porphyry*, read *basalt*.

P. 178, line 11 from bottom, for "subjects," *read* objects.—P. 183, l. 18 from bottom, erase "of;" l. 17 from bottom, for "and," *read* a.—P. 184, *insert* the word *it*, at the beginning of the 9th line from the top.—P. 187, l. 6 from top, for "exist," *read* be.

ERRATA FOR VOLUME VI.

Page 425, and 462 index, the name of Prof. Webster of Cambridge, should be J. W. instead of J. H. Webster.
